**Re: Patio landscaping**

We are delighted with the result. The area has been transformed from what was, to all intents and purposes, a sandpit, into a beautiful, practical area.

We really appreciated Ruben's willingness to help with all aspects of the project - from sourcing the Yorkstone, improving the original patio design and making practical suggestions, all before the back-breaking work of laying the stone.

A great result!

**Re: Drive, pond & summerhouse**

We are absolutely thrilled with the Summerhouse. A dead, forgotten area of the garden has been transformed into a sympathetically constructed, natural-looking pond, which is a stunning visual feature. It already looks as though it has been there for 50 years! Ruben's valued input was a major contributor in achieving this. The workmanship on the Summerhouse is first-class.

**Re: Pool House, General Landscaping**

Ruben's excellent project management skills were invaluable; from liaising with architects and engineers to sourcing electricians and skilled bricklayers - everything was effortlessly under control. A clean and well-maintained site was kept at all times, thereby causing minimal disruption to our everyday lives.
